

Sign up to Develop Your Own UVM Nutrient Management Plan

SIGN UP NOW to take advantage of the opportunity of getting assistance with Nutrient Management Planning on your farm through the UVM planning course.

Funds are available for soil and manure samples, your time at the class, class sign-up fee, one year of GoCrop software, and NRCD support for class preparation and course completion.

Farmer-Developed Nutrient Management Plans Can:

- ⇒ Improve farm economics with optimized yield goals & minimized inputs
- ⇒ Serve as a public relations tool
- ⇒ Broaden sense of farm environmental features and considerations
- ⇒ Help you be compliant with state regulations

The course will be led by UVM Extension Agronomic and Soils Specialists, including Heather Darby, with extensive support from your local Conservation District staff.

January—
February 2020

6 classes
Once a week
10:30 - 2:30
