

## WHO WE ARE

The Orleans County Natural Resource Conservation District (OCNRCD) was established in 1946 as a non-regulatory organization led by local landowners. We strive to protect natural resources by seeking solutions to local environmental concerns and providing resources to address them.

Our current focus is to support Orleans County communities and landowners in their efforts to improve water quality issues. Our extensive partnerships with state, federal and local organizations enable us to coordinate resources locally to support conservation land use practices.

### Staff

Sarah Damsell — *District Manager*  
Emily Irwin — *Land Treatment & Nutrient Management Planner*  
Stephen Mengel - *Bookkeeper*

### Board of Supervisors

Tim Buzzell (Morgan) — *Chair*  
Dexter Randall (Troy) — *Vice Chair*  
Stephanie Mason (Albany) — *Secretary*  
Joanna Lidback (Westmore) - *Treasurer*  
Jared Nunery (Craftsbury) — *Supervisor*  
Walter Medwid (Derby) — *Associate Supervisor*  
Brad maxwell — *Associate Supervisor*

Conservation District**

## Equipment Rental Program

**Promoting sound conservation  
practices since 1946.**

## Portable Truck Scales

### Set of 6 GEC MD 500 portable wheel load truck scales

Portable truck scales can be used to determine manure application rates and harvest yields.

- Use the scales to weigh your manure spreader or harvest truck empty and full

#### Scale rental details:

- Each scale weighs 48 lbs, and they come in a 29" x 29" x 32" case that fits all six scales
- Case and each scale can be loaded separately into trunk of large SUV or bed of truck
- For your first rental, OCNRC staff will bring the scales to you and assist you
- For all rentals after initial use, you will be responsible for transporting the scales

**Rental fee: \$50 per day or by donation**

## Soil Probe Lending

Taking regular soil tests every two to three years can help you monitor your soil health and optimize your productivity.

The OCNRC has three soil probes available at our office in Newport to borrow with an **\$50 deposit**.

You can also purchase from us your own new soil probe for \$85!

## AerWay

### AerWay Soil Aerator Tiller

Use the AerWay to reduce compaction while increasing soil health and crop yields by improving water and nutrient filtration. The aerator can be used on corn, hay, and pasture land.

#### Aerway rental details:

- The Aerator is 20 ft wide and must be pulled with at least a 140 hp tractor
- Farmers are responsible for the transport the Aerway, which requires a one-ton truck with a pin hitch
- Each farmer will be asked to estimate the acreage they will do and will have the equipment for two-four days (with weather exemptions)
- It is the farmer's responsibility to maintain the equipment and to address any preventable damage or repairs before it goes to the next farm.

**Rental fee: \$6/acre**

## Portable Skidder Bridge

### Portable Skidder Bridge

Control sediment pollution associated with timber-harvesting operations. Bridges are stored at the Goodridge Lumber yard in Albany, VT

**Rental fee: \$100 per month with a security deposit of \$100**

## No-till Drill

### Sunflower 9412 Drill

Use the drill to establish your cover crop, rotate or convert annual crops to perennial crops, improve hay or pasture by adding legumes or a legume/grass mix and establish legumes (i.e. soybeans) or cereal grains without primary tillage.

- The drill has two seed boxes – one for larger grass seed, and one for small legume seeds
- The 3876lb drill is 10ft wide and requires at least 100HP tractor with a pin and 3- point hitch.
- It is the farmer's responsibility to maintain the equipment and to address any preventable damage and repairs before it goes to the next farm
- Farmers are responsible for picking up the drill from the previously contracted farmer which requires a ¾ ton truck.
- Each renter will be asked to estimate their usage time before they rent the drill, and the district reserves the right to set the duration of each rental on a case-by-case basis

**Rental fee: \$7/acre**

## Other Services

**Soil sampling:** \$32/sample includes soil maps, lab fee, shipping and staff time.

**Manure pit safety signs:** \$15/sign

**Conservation road signs:** \$5/sign or by donation.

**Free Manure Sample Shipping:** Drop it off, we'll mail it!

**Annual tree and shrub sales:** check website for catalog
