

MANURE INJECTION FIELD DAY & SOCIAL HOUR WITH FREE BEER!

Manure injection is an effective management strategy for maximizing the nutrients available to your crops and minimizing nitrogen loss and phosphorus runoff. Join the Orleans County Natural Resources Conservation District, NRCS, Mike Chaput of Chaput Family Farms, and Scott Magnan of Scott Magnan's Custom Service for a workshop covering the ins and outs of manure injection systems on annual crops and on grassland. Farmers will have an opportunity to get an up-close look at the Chaput dragline injection system and a VTI Vertical Tillage Injector toolbar, talk with custom applicators, discuss costs and learn about financial assistance programs.

Workshop details:

1:00 – Welcome - *introduction to manure injection*

1:15 – Mike Chaput & Nick Comerchi, NRCS – *Overview of system at Chaput Family Farms*

2:00 – Scott Magnan, Scott Magnan's Custom Service – *Manure injection on grassland, overview of VTI Vertical Tillage Injector toolbar*

2:45 – Emily Finnegan, OCNRCD – *opportunities for technical & financial assistance*

3:00 – Q&A with all presenters, social hour

Contact Emily Finnegan to register at 802-624-7022 or emily.finnegan@vt.nacdnet.net
